

1 Q. Reference PUB-NLH-008: How will the Maritime Link (ML) be taken into account in  
2 the planning of the generation reserves post interconnection?

3

4

5 A. The Maritime – Island Link (MIL) will have the ability to import up to 300 MW from  
6 the North American grid to the island. It is the intent to have reserve sharing  
7 arrangements in place with neighbouring jurisdictions such that this 300 MW can  
8 be taken into account in the planning of the generation reserves post  
9 interconnection
