

1 Q. Reference: Energy Supply Risk Assessment Update, November 30, 2016, page 14,
2 lines 4-8. When is the root cause investigation of the Bay d’Espoir Penstock 1 leak
3 expected to be complete?
4

5
6 A. Hydro continues to work with its consultant, Hatch, on the root cause report. Hatch
7 has, in turn, engaged third party materials testing organizations to complete various
8 materials testing as part of the root cause investigation into the penstock leaks.
9

10 The sample testing results are required to finalize the analysis and report. Hatch
11 expects to receive the materials testing results in January and Hydro expects to
12 have a final report by the end of February.
