

*Requests for Information*

---

1 **Q. Further to the response to PUB-NP-002, provide the terms of reference and the**  
2 **committee composition for the Inter-Utility System Planning and Reliability**  
3 **Committee.**  
4

5 A. The Inter-Utility System Reliability Committee (the “Committee”) was established in  
6 December 1999 with the objective of improving service to customers served by the Island  
7 Interconnected System. Key objectives of the Committee are to reduce outages arising  
8 from under-frequency load shedding, set reliability targets, and initiate and monitor  
9 activities to reduce the frequency and duration of outages on the Island Interconnected  
10 System.

11  
12 In May 2013, the Committee broadened its scope to include transmission and distribution  
13 system planning oversight and was renamed the Inter-Utility System Planning and  
14 Reliability Committee.

15  
16 The current Committee composition includes:  
17

18 **Newfoundland Power:**

19 Gary Smith, Vice President, Engineering & Customer Operations

20 Sean LaCour, Manager, Operations

21 Lorne Henderson, Manager, Revenue & Supply  
22

23 **Newfoundland & Labrador Hydro:**

24 Rob Henderson, Vice President, Newfoundland & Labrador Hydro

25 Paul Humphries, Vice President, System Operations & Planning

26 Bob Butler, Manager, System Operations
