

1 **Q. In order to provide a record copy of document(s) already provided informally,**  
2 **please provide copies of all call center trunking or traffic studies conducted recently**  
3 **to evaluate call center capacity needs.**  
4

5 A. Newfoundland Power receives a number of monthly call traffic reports generated by its  
6 telecommunications provider (“BellAliant”). These reports highlight three primary sets  
7 of Customer Contact Centre call data, which are reviewed by Customer Contact Centre  
8 management.  
9

10 After large system events, such as the power outages experienced by customers in  
11 January 2013 and again in January 2014, Customer Relations and Information Services  
12 staff analyze these reports looking for opportunities to improve the Company’s telephony  
13 service for customers. For example, after the January 2013 power outage, an additional  
14 24 trunks were ordered and configured to provide more capacity for customers wishing to  
15 speak to a customer service representative in the Contact Centre. Following a review of  
16 the data contained in the January 2014 reports, additional trunks have been ordered to  
17 improve service within the Contact Centre. These additional trunks will increase  
18 capacity of the Contact Centre and provide opportunities for redundancies within the  
19 Contact Centre technology.  
20

21 Examples of the monthly reporting are included in Attachments A, B, and C. These  
22 attachments highlight Newfoundland Power’s call traffic experienced during the January  
23 2014 outages.  
24

25 Attachment A –Monthly Traffic Report Outage Lines - Jan 19<sup>th</sup> 2014, is representative of  
26 customer outage calls delivered to BellAliant’s Virtual Facilities Group (“VFG”) called  
27 DIDTRB. This VFG is directly associated with 49 Inbound Contact Centre Outage Lines  
28 and subsequently overflows into 33 Contact Centre Multi-use lines (see the response to  
29 Request for Information PUB-NP-096, items 4 and 5 in the architecture diagram).  
30

31 Attachment B –Monthly Traffic Report Customer Service Lines - Jan 19<sup>th</sup> 2014, is  
32 representative of customer service calls and overflow customer outage calls delivered to  
33 BellAliant’s VFG called DIDCUS. This VFG is directly associated with 33 Inbound  
34 Contact Centre Multi-Purpose lines and subsequently overflow into BellAliant’s Call  
35 Prompter Service Menu (see the response to Request for Information PUB-NP-096, items  
36 5 and 6 in the architecture diagram).  
37

38 Finally, Attachment C –Monthly Traffic Detail - HVCA - Jan 19<sup>th</sup> 2014, is representative  
39 of customer outage calls placed to Newfoundland Power’s Outage Reporting Service (see  
40 the response to Request for Information PUB-NP-096, item 3 in the architecture  
41 diagram).

**Monthly Traffic Report Outage Lines  
January 19<sup>th</sup>, 2014**

**Bell Aliant Customer Reports**

**Customer Name: NLP**

**Sales Contact: Please contact your Bell Aliant Sales Representative**

**Beginning Period: December 20, 2013 Ending Period: January 18, 2014**
