3 **detail any changes in transmission lines inspections and maintenance, including any**  
4 **changes beginning in 2014.**  
5
- 6 A. Transmission lines inspection and maintenance (CM and PM) practices have not  
7 materially changed since 2009.  
8
- 9 Inspection and maintenance guidelines and practices are periodically reviewed. Since  
10 2009 the reviews have only identified the need to provide clarification or additional  
11 details on components to be inspected, updating references to operational procedures  
12 noted in the document, or providing additional instruction for the monitoring of  
13 components that have been identified as potential concerns.  
14
- 15 There are no changes proposed to the transmission lines inspection and maintenance  
16 practices for 2014.
