

- 1 **Q. How many of Newfoundland Power’s distribution feeders have line-ties to other**  
2 **feeders?**  
3  
4 A. 249 of Newfoundland Power’s 306 distribution feeders have line-ties to other feeders.<sup>1</sup>

---

<sup>1</sup> Line-ties are considered to be tie points to adjacent feeders outside of substations and does not include feeder interconnection points through substation bypass arrangements. The 57 feeders without line-ties to other feeders are primarily located in rural areas with no adjacent feeders available.
