

- 1 **Q. Can Newfoundland Power monitor any of Hydro’s system operations via the**
2 **SCADA system? If not, are there any agreements with Hydro to do so?**
3
4 A. Newfoundland Power’s SCADA system monitors 754 unique data points exchanged
5 through the ICCP link to Hydro’s Energy Management System.¹ This total includes
6 approximately 400 data points that first became available in June 2014. There are no
7 outstanding requests for data points to be added to the exchange.

¹ This includes the status of 431 digital points (open/closed) and 323 analog telemetry points (voltage, MW, MVAR, etc.).
