

- 1 **Q. Who controls transmission and distribution switching during normal working**
2 **hours, the System Control Center or the Central Dispatch Team? Who prepares**
3 **switching procedures?**
4
- 5 A. The System Control Center controls transmission and distribution switching at all times.
6
7 Switching orders are prepared by qualified operations and engineering staff.¹ A
8 switching order undergoes 3 levels of review and approval before the switching order can
9 be executed.

¹ To be qualified in the preparation and execution of switching procedures operations and engineering staff must complete internal training.
