

1 Q. Schedule B, page 7 of 39 - Please update Table 2 to include the amount of notice
2 provided by Hydro for each capacity assistance request and the response time by
3 CBPP for each of Hydro's requests.

4

5

6 A. Hydro did not record the time that it notified Corner Brook Pulp and Paper of the
7 requirement for capacity assistance but rather recorded the times that a capacity
8 assistance period began and ended. Hydro endeavors to provide CBPP with as much
9 advance notification as possible and would normally identify the requirement
10 during its day ahead reserve assessments. There are times however, when such
11 advanced notice cannot be provided due to unforeseen issues with Hydro's
12 generation and/or higher than anticipated customer demand. Additionally a 10
13 minute response time for capacity assistance is aligned with North American
14 reliability standards pertaining to spinning reserves.
