
1 Q. **Re: Volume II, Tab 12 – Install Asset Health Monitoring System – Upper Salmon**
2 **Generating Plant**

3 Volume I, Tab C, pg C-32:

4 *Future installations at other locations are intended based on these enhancements.*

5 What other locations would these installations be applicable to? What are the
6 anticipated costs?

7

8

9 A. This system would be applicable to other remote hydro plants which are Hinds
10 Lake, Cat Arm, Granite Canal, Star Lake, and Paradise River. Although project
11 estimates have not been developed for these future projects at this time, it is
12 expected that the cost for each site will be similar to the cost for this project.
