**Interest in the Proceeding**

List the topics/issues you are interested in and the proposed disposition.

- The reasonableness of Hydro's costs in the Labrador Interconnected system, and the reasonableness and fairness of the rate increase to the Labrador Interconnected that Hydro is applying for in the present application.
- The reasonableness and fairness of the deferral account applied for by Hydro to deal with costs and savings arising from the Labrador-Island Link, the Labrador Transmission Assets, and the Maritime Link.

What facts or documentation will you rely on to support your intervention?

- Hydro's Application
- Hydro's answers to requests for information
- Analysis to be performed by an expert consultant to be retained
- Evidence given through examination of witnesses

How is your interest unique and not represented by others?

This intervention represents the interests of ratepayers on the Labrador Interconnected System, being the communities of Sheshatshiu, Happy Valley-Goose Bay, Wabush, and Labrador City. Although the Consumer Advocate represents the interests of all ratepayers, there may be times when the interests of Island consumers conflict with those on the Labrador Interconnected System. Moreover, the particular interests of certain Island consumers are likely to be represented by Newfoundland Power. We propose to represent Labrador Interconnected System customers only where those diverge from the general interests of all ratepayers.

**Participation in the Proceeding**
