

1 Q. For each date specified in NP-NLH-030, please explain why the Holyrood
2 generators, including the thermal units and the gas turbine, were operated at the
3 loads recorded on that day.

4

5

6 A. Please refer to notes in each of the tables in Hydro's response to NP-NLH-030 for an
7 explanation as to why the Holyrood generators, including the Thermal Units and the
8 Gas Turbine, were operated at the loads recorded on the days in question. As
9 indicated in Hydro's response to NP-NLH-020, Hydro dispatches its generation
10 resources (including the Holyrood Thermal Units and the Gas Turbine) to reliably
11 position the system to withstand the single worst contingency event.
