

1 Q. Please use Hydro's updated fuel prices to update Appendices A-K of the March 22,  
2 2018 COS filing.

3

4

5 A. For the purpose of assessing the proposed cost recovery under the proposed  
6 interim Utility Rate, Hydro has provided estimated Test Year revenue requirements  
7 from Newfoundland Power based on the updated fuel price forecast.<sup>1</sup> Therefore,  
8 the Board has sufficient information before it to assess the cost recovery provided if  
9 the Board approves the proposed interim rate increase in the Utility Rate.

10

11 To provide the detailed information requested would require Hydro to complete  
12 four additional cost of service studies (two for each Test Year), compute customer  
13 rates and customer rate impacts, and prepare a full set of financial returns. Hydro  
14 considers the provision of the requested information to be unduly onerous and the  
15 information cannot be provided in the time permitted to respond.<sup>2</sup>

---

<sup>1</sup> Please refer to Appendix B of Schedule 1 to the 2018 Utility Customer Interim Rates Application.

<sup>2</sup> The Board issued P.U. 2(2018) on January 26, 2018. Hydro required 40 working days to provide the requested information.
