

1 Q. Might Hydro be denied a Certificate of Approval, or any other required environmental
2 approvals, to operate Holyrood until 2030?

3

4

5 A. Newfoundland and Labrador Hydro currently has a Certificate of Approval (AA22-065671) for
6 the operation of the Holyrood Thermal Generating Station (“Holyrood TGS”) through June 30,
7 2027. A decision on the status of the approval beyond this date would rest with the Department
8 of Environment and Climate Change. It is currently anticipated that operation beyond June 2027
9 would be approved provided the Holyrood TGS is maintained and operated in compliance with
10 regulatory requirements.
