

1 Q. **Reference: RRAS, 2022 Update, Vol. III, page 15 (96 pdf)**

2 Citation:

3 The extent to which resource builds are required to support the interconnection  
4 agreements may delay this timeline. As the load requests are advanced,  
5 sensitivity forecasts will continue to be developed for use in various planning  
6 studies.

7 Have any sensitivity forecasts of this type been prepared? If so, please

8 a) describe them in detail, and

9 b) provide copies.

10

11

12 A. Additional sensitivity forecasts have not been developed at this time; they will be included in the  
13 Reliability and Resource Adequacy Study – 2023 Update.
