

1 Q. **Reliability and Resource Adequacy Study Update, November 15, 2019**

2 ***TGS Study Reports***

3 Further to PUB-NLH-166, state whether General Electric has agreed to or offered for discussion
4 a limit for operation at SCL levels below 2,833 MVA, and if so identify such levels. If no limit has
5 been set, state whether GE has confirmed that they will allow operation up to 900MW without
6 any SCs and with the SCL below 2,833 MVA.
