

1 Q. **Reference: Newfoundland and Labrador Hydro - Long-Term Load Forecast Report**

2 Regarding Appendix B to the 2023 Long-term Load Forecast Report (LTLFR), please provide the
3 following for each of the five referenced regressions:

4 a) F-values for each regression

5 b) Significance statistics for each parameter estimate, specifically the t-statistic and p-value

6 c) Descriptions of the justification and data basis for each regression variable

7 d) Values applied in each forecast for each variable, X1, X2.Xn.

8

9

10 A. Please refer to PUB-NLH-311, Attachment 1, Excel file for the regression details requested.

11 Please note that F-values are not provided for equations without an intercept variable. Dummy
12 variables have been used to reflect abnormalities specific to each year.
