

1 Q. **Reference: Application**

2 In 2020 what was the capital cost per megawatt of Hydro's hydro capacity? Is there a production
3 cost per kWh for Hydro's hydro capacity?

4

5

6 A. The 2020 capital cost per megawatt for Newfoundland and Labrador Hydro's ("Hydro") hydro
7 capacity was \$11,022/MW. As Hydro assumes no cost for water usage associated with
8 production at its hydraulic generating facilities, there is no production cost per kWh for Hydro's
9 hydro capacity.
