

1 Q. Did Hydro consider an interruptible tariff in which it would be able to curtail local non-firm rate
2 customers when prices exceeded certain levels and share the excess revenue with those
3 customers?

4

5

6 A. Newfoundland and Labrador Hydro (“Hydro”) did not consider implementing an interruptible
7 tariff tied to the market value of exports. Under the proposed non-firm rate, non-firm customers
8 have the option to limit their non-firm purchases from Hydro when the cost of non-firm energy
9 is not economic from the customer’s perspective.
