

1 Q. What would be the effects of implementing an hourly, daily or weekly pricing for non-firm
2 power? How often does Hydro now evaluate and contract for export power sales?

3

4

5 A. Newfoundland and Labrador Hydro (“Hydro”) would like to analyze the actual utilization of the
6 non-firm rate based on market prices before commenting on the impact of a more frequent
7 update of the rate to determine if it would result in additional benefits for customers. Please
8 refer to Hydro’s response to PUB-NLH-015 of this proceeding for additional information.

9 Hydro sells power on a variety of time horizons including yearly, monthly, weekly, daily, and
10 hourly. Sales of hourly blocks of exports are evaluated and scheduled hourly.
