

1 Q. How often does NL Hydro divert water out of the Smallwood reservoir due to reduced load
2 demand? Provide particulars as to dates, quantities and values for the period from January 1,
3 2020 to May 15, 2023.

4

5

6 A. The Smallwood Reservoir is not a Newfoundland and Labrador Hydro (“Hydro”) asset; it is
7 owned and controlled by the Churchill Falls (Labrador) Corporation. Hydro does not have any
8 control over the diversion of water from that reservoir and is unable to provide the information
9 requested.
