

1 Q. Please confirm that neither Newfoundland Power nor its customers will bear any risk associated
2 with deferred supply costs attributable to the Industrial Customer class. If this cannot be
3 confirmed, please explain.

4

5

6 A. As noted in Newfoundland and Labrador Hydro's ("Hydro") response to PUB-NLH-008 of this
7 proceeding, the Board of Commissioners of Public Utilities ("Board") will determine, through a
8 separate application, the allocation of the balances in the Supply Cost Variance Deferral Account
9 by customer class. Hydro has no ability to transfer to Newfoundland Power Inc. or its customers
10 those balances determined by the Board to be due from Island Industrial customers.
