

1 Q. **Reference: Application, Refurbish BioGreen Sewage System (2023) – Holyrood**

2 Is the proposed project compatible with alternative uses of the site that may come about as a
3 result of the demand/supply adequacy study

4

5

6 A. The BioGreen sewage system is required for the Holyrood Thermal Generating Station
7 synchronous condenser operation. The justification for this project is independent of the
8 outcomes of the ongoing *Reliability and Resource Adequacy Study Review*.
