

1 Q. **Reference: Schedule 2 Five-Year Plan (2024-2028), Page 12, Chart 10**

2 Explain how Hydro has taken potential load growth arising from electrification into account in
3 the development of its Five-Year Capital Plan.

4

5

6 A. In Newfoundland and Labrador Hydro's ("Hydro") 2024 update to the Reliability and Resource
7 Adequacy Study, Hydro intends to include specific impacts from electrification as part of its
8 analysis. That filing will inform the impact of electrification on forecasted load growth and any
9 corresponding additional supply alternatives that may be required. Following this update, Hydro
10 will include the forecast capital requirements associated with electrification in its 2025 Capital
11 Budget Application.
