4 **opposed to a billing impact, would Mr. Todd’s concerns with**
5 **uneconomic bypass be alleviated? If not, why not?**
6
7 RESPONSE: Elenchus agrees that NP has provided an estimate of the total cost impact
8 on Newfoundland and Labrador Hydro in its *Sandy Brook Plant Economic*
9 *Evaluation*, as opposed to a billing impact. Nevertheless, for the reasons
10 stated in the response to NP-CA-017, the fundamental concern of Elenchus
11 that NP has not given due consideration in its economic analysis to the
12 electricity sector evolution scenarios that will result in uneconomic bypass
13 is not alleviated.
