

- 1 **Q. (Application Volume 2, Electrification, Conservation and Demand Management**
2 **Plan 2021-2025, page 20) In Table 4, the cumulative energy reduction over 2021 to**
3 **2025 due to CDM programs is given as 1,609.7 GWh. Please explain the difference**
4 **between this figure and the figure of 1,279 GWh given on page 2-15 of Volume 1.**
5
- 6 A. The Table 4 referenced in this Request for Information presents annual energy and
7 demand reduction estimates for 2021 through 2025 as a result of the implementation of
8 the CDM programs contained in the *Electrification, Conservation and Demand*
9 *Management Plan: 2021-2025* (the “2021 Plan”). The 2021 Plan was developed in
10 partnership by Newfoundland Power and Newfoundland and Labrador Hydro (“Hydro”).
11 Accordingly, the estimated energy savings of 1,609.7 GWh represents the energy savings
12 of the customers of Newfoundland Power and Hydro combined.
13
- 14 The figure of 1,279 GWh presented on page 2-15 of Volume 1, as referenced in this
15 Request for Information, represents the cumulative energy savings of Newfoundland
16 Power’s customers from 2021 to 2025. Energy savings of Hydro’s customers are not
17 included in this figure.
