

- 1 **Q. Further to Newfoundland Power’s response to NLH-NP-064, can Newfoundland**
2 **Power provide an estimate of non-electric customers who have installed mini-split**
3 **heat pumps? If yes, please provide the estimate and detail any assumptions**
4 **associated with the estimate. If not, why not?**
5
- 6 A. Newfoundland Power estimates that approximately 2.5% of its non-electric Domestic
7 customers have installed heat pumps. The Company’s estimate is based on the annual
8 takeCHARGE marketing survey and reflects the number of customers that identified their
9 primary source of heat as non-electric and who also identified owning a heat pump.
