

1 **Q. Memorial University recently completed construction of a major new Science**
2 **Facility so it may be considering the future of the old Science Building, which**
3 **is adjacent and very close to MUN-T2. Has NP consulted with the University**
4 **about any planned capital works regarding the old Science Building and how**
5 **that may affect the MUN-T2 site?**
6

7 A. Yes, Newfoundland Power has discussed the future of the Science Building with
8 Memorial University. The university has advised that future plans for the Science
9 Building are being considered, but have not been finalized. No impact on Memorial
10 Substation has been identified at this time. The Science Building is one of 27 buildings
11 on the St. John’s campus served by Memorial Substation.¹

¹ An additional 10 buildings normally served by Long Pond Substation can also be served by Memorial Substation.
