

1 **Q. (Reference Application, Schedule A, page 3)**
2

3 **It is stated “a failure of MUN-T2 could result in damage to substation**
4 **equipment, customer infrastructure and public property.” In light of the**
5 **dangerous location, did NP consider relocation of the substation?**
6

7 **A.** No, Newfoundland Power has not considered relocation of the substation. When all
8 equipment is in normal operation and functioning properly, the substation is not an
9 unreasonable safety risk to Memorial University its students, staff or the public.
