6
- 7 A. AMCL was made aware of the requirements set out in the Provisional Guidelines. Their
8 recommendation is that the software should support the current asset management
9 practices and enable more mature asset management practices as they evolve within
10 Newfoundland Power. AMCL further stipulates that it would be prudent to select and
11 implement an asset management software that can be expanded to incorporate
12 additional functionality in the future.¹ For more information, see the response to Request
13 for Information PUB-NP-045.
